

Tristar Group Celebrates World Environment Day 2018

The global network of the Tristar Group comprising 18 countries simultaneously celebrated World Environment Day on June 5 with town hall gatherings. In Dubai, where the head office is located, Tristar Group CEO Eugene Mayne encouraged all staff to support this year's theme of 'Beat Plastic Pollution' by refusing items that cannot be reused. During the Dubai event colored sketches submitted by children of Tristar staff worldwide were displayed. The colored sketches carried four themes which depicted how to protect the environment and conserve natural resources. "This is a good initiative that will make young children already aware of environmental issues," said Mr. Mayne.
